

Steel and Stainless Steel Cycle Parking

OLLERTON

Sheffield Cycle Stands in Stainless Steel with bespoke Tapping Bar/Sign Strip, Southport

Over the past ten years there has been a significant trend towards providing a more sustainable transport infrastructure. This has been driven by work being carried out by charity organisations such as Sustrans and independent bodies such as Cycling England. Both are committed to promoting sustainable travel, in particular cycling, to our places of work and schools.

One initiative promoting cycling across the UK is the National Cycle Network which operates over 230 million journeys each year, taking people to work and kids to school. In addition to this there are other schemes such as 'Bike It' and 'Safe Routes to School'. More details on either of these can be found at www.sustrans.org.uk and www.saferoutestoschools.org.uk

Sustrans is one of the UK's leading sustainable transport charities, with the aim of reducing the environmental impact of transport and enabling people to choose active travel to benefit their health.

A key element in encouraging more people to adopt sustainable travel methods, such as cycling, is the provision of adequate facilities within our public spaces and schools. This incorporates ongoing development of a high quality cycling infrastructure, prioritising route design and selection, signage and cycle parking facilities.

The range of Ollerton cycle stands provides cyclists with an ideal solution to safely secure and store bicycles whilst not in use. A wide variety of stands is available in steel and stainless steel, with a selection of styles offered to complement any landscape.

Ollerton steel cycle stands are hot dip galvanised, giving excellent weathering qualities, and can be powder coated in a full range of standard RAL colours. Stainless steel cycle stands are manufactured from grade 316L stainless steel, meaning that they offer excellent corrosion resistance and require very little maintenance to retain their original contemporary appearance.

Steel and Stainless Steel Cycle Parking

OLLERTON

Pennant Stainless Steel Cycle Stands, Crown Point, Denton

- Cycle stands are available in a variety of different styles to meet both the functional requirements and aesthetics of any scheme.
- **Material:** Manufactured in mild steel which is galvanised to prevent corrosion and rusting. All designs are also available in grade 316L stainless steel, which contains a greater chromium and nickel content and includes molybdenum, this makes it more durable and less likely to rust or corrode or to have pit marks.
- **Finish:** Mild steel is available with a galvanised polyester powder coated finish. A full range of RAL colours is available, please contact our Sales Office for more information. Stainless steel is provided with a brushed satin finish.
- **Fixing Options:** All cycle parking is supplied as ground fixing (root fixing) as standard. Base plate fixing is available on request.

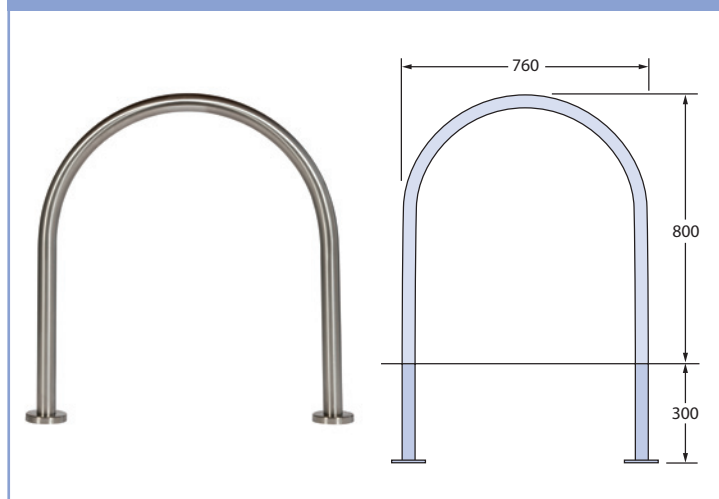

PENNANT CYCLE STAND

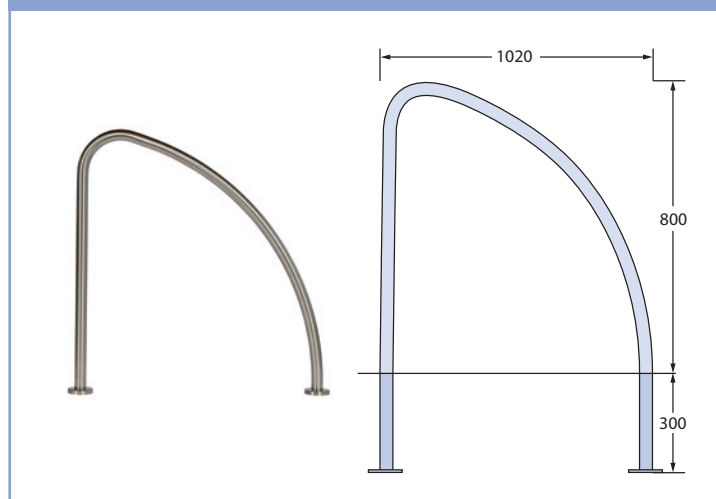

LOOP CYCLE STAND

HOOP CYCLE STAND

FIN CYCLE STAND

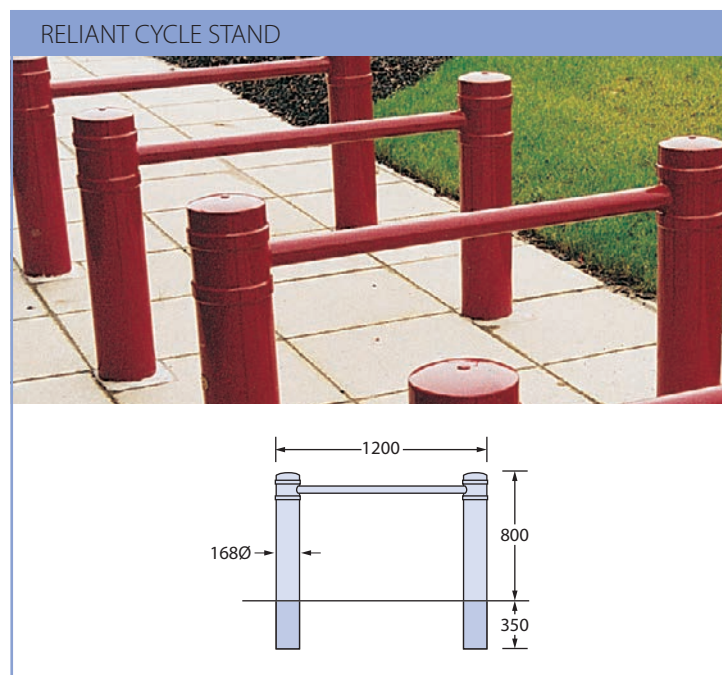

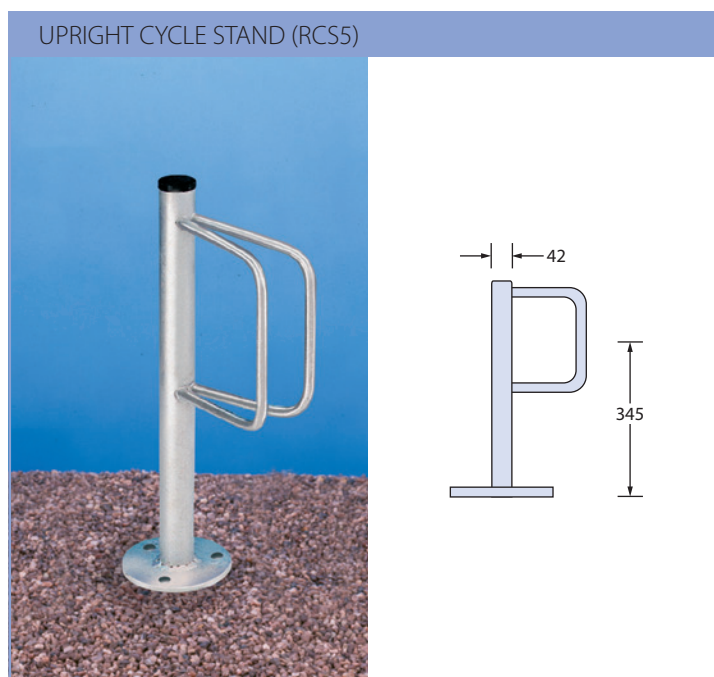

Upright Cycle Stand (RCS5)

- **Material:** Available in mild steel which is galvanised to prevent corrosion and rusting.
- **Finish:** Available with a galvanised only finish, or galvanised and polyester powder coated. A full range of RAL colours is available; please contact our Sales Office for more information.
- **Fixing Options:** All cycle parking is supplied as root fixing as standard. Base plate fixing is available on request.

Reliant and Festival Cycle Stands

- The upright cycle stand uses the minimal of space and supports the bicycle by the front wheel.
- **Material and Finish:** Available as galvanised steel only.
- **Finish:** Base plate fixing.
